

Europe sowing a Harmonic System of Nations.

Apr, 2023

1. TPS.

2. Hi everyone. It is a Joy to be part of this attempt to dream and assert together the *unification* not only of Europe but of all Nations in order to *restore the hierarchical Plan and Order on Earth*. Despite all that is happening now in the worlds of Appearance, as part of the NGWS we are the subjective *prototype* for the future *hierarchical Humanity*. As such, we are expected to discriminate and transform the subjective, subtle, causes of the past and present conflicts into a harmonic system of understanding and solutions, in order to prepare the bases of the Aquarian *Brotherhood*. As we know, Brotherhood is the *main Idea* of the Water-Bearer Age whose realization in the human kingdom is indicated for its last decanate, in 1,400 yrs.

3. So, let's consider how **Europe**, one of the 5 *active Centers of our planetary Logos*, can serve the Idea of universal Brotherhood by its Essence and *systemic* Function, in the *planetary System*. First, we will consider the myth of the entity *called* Europe because, as we know, symbols reveal the true or real nature of things.

4. The first written traces of the **myth of Europa** date back to the times of Homer and Hesiod, around the eighth century BC: in the *Iliad* Zeus evokes, among his many loves, also the one with Europa, while in the *Theogony* Hesiod mentions a Europa daughter of Tethys, one of the sea deities wife to Oceanus.

5. The most consolidated myth tells of Princess Europa, daughter of the Phoenician king Agenor who, having gone down to the sea with her maids, met a *white bull* of such a great beauty and meekness that she desired to ride him. The bull, however, immediately rushed across the sea carrying the girl with him. The race of the white bull that had kidnapped Europa ended on the island of Crete, where Zeus assumed the form of an *eagle* and with her begat three children.

The myth continues by narrating that the brothers of Europa set off in various directions to look for their sister: in particular, one of these, Cadmus, after various vicissitudes married Armonia, daughter of Aphrodite and Ares (Venus and Mars). It was on that occasion, and it was the very last time, that all the gods left Olympus and came down to earth to join the wedding feast of a mortal - is this the allegory for the beginning of a new phase, of a new civilization and sub-race, the Greek-Roman one?

6. In the myth of Europa, Zeus took the white bull into the sky, thus giving birth to the constellation of the Bull.

In general, the myth represents a movement of civilization from East to West and the name *Europe*, given to the western territories, is the seal of this movement.

7. The bovid and moon cults veiled by the myth of Europa were thus transmitted through migrations from the Middle East and Africa to Greece (the bull's horns have the same shape as the crescent moon, and the two symbols were connected in religious rites; not only, astrologically, the Moon, Mother of the Form that veils the inner Light, is at its greatest power or exalted in the Sign of Taurus).

8. The transmission of the myth of Europa in the Middle Ages was entrusted to Ovid's *Metamorphoses*, and then, from the fifteenth century, the Christianized version of the moralized Ovid spread, according to which Europa was the human soul and the bull represented the Christ who redeems it by transporting it from Earth to Paradise.

In esoteric terms, the myth can be seen as the initiatory destiny of the human soul, born from animality, but gradually freeing itself from it through the conflicts between its earthly nature and its divine nature: the latter, through the sacrifice of the former, develops and triumphs.

9. So, Taurus and the 4th Ray seem to dominate the qualities of this myth, and even the eagle God recalls the opposite Sign of Scorpio, associated with our 4th human Hierarchy and the 4th Ray Mercury.
10. The continent of Europe to be a *4th Ray planetary Center* or a *planetary Ajna Center* at the Soul or at the Personality levels, rather than a *2nd Ray Heart Center* (see the 12 Stars of its banner), are plausible hypothesis; hence, its importance for the current 5th Aryan race as well as for the NGWS, indicated as Forms of the planetary Ajna Center - and the NGWS is governed precisely by the Sign Taurus!
11. As esoteric astrologers know, Taurus, Pluto and Earth, through our planetary Head Centre, Shamballa, are of primary importance today:

“There is at this time, owing to the influx of the Shamballa force, the establishing of a peculiar relation or alignment between the constellation, Taurus (with its own specific alignment with the Pleiades and Great Bear) the planet, Pluto, and our Earth. This produces much of the present world difficulty and one which the modern astrologer would do well to consider. It constitutes a major cosmic triangle at this time, conditioning much that is now happening.”

This Shamballa force is that which “*fans or intensifies the light by the removal of obstructions and proceeds from far distant places, pouring through the eye of illumination into those spheres of influence upon the sorrowful planet, the Earth, impelling the Bull upon its onward rush.*” So speaks the *Old Commentary*. The import of this is that the energy of will—newly released by Sanat Kumara upon our planet—emanates, via the head centre of the planetary Logos, from the Great Bear; it is stepped down in vibration via one of the Pleiades (hence its influence upon matter and hence also its pronounced Taurian effects upon humanity) and so enters into the solar system. It is there absorbed by that major centre of our planetary life to which we give the name, Shamballa. Its effect is necessarily twofold. It produces in [377] certain nations, races and individuals, a welling up of the self-will or of the will-to-power which is characteristic of the developed lower nature, the personality aspect of integrated selfhood. It produces—though less readily—a stimulation of the will-to-serve the plan as it is grasped by the world aspirants, the world disciples and initiates. Thus are the purposes of Deity materialised.” (EA, 376-7)

12. So let's think about when **Pluto**, the 1st Ray Destroyer of obsolete forms, will be again in Taurus as a crucial and fundamental period for Europe (from 2096 to 2128, a period which holds in itself the date of the effective beginning, according to the Tibetan Master, of the Age of Aquarius in 2117!), or now Pluto entering **Aquarius** for the next 19 years, the Sign which rules the *great planetary Heart center*, the Hierarchy, square **Taurus**, how It will stimulate the emergence of new Light. The last time Pluto was in Taurus was from 1852 to 1883, years which saw not only important political upheavals and restorations

13. (Btw, the last incarnation of my Italian nation was in 1861 with Pluto, the Moon and Mars in Taurus), but also the beginning of the first dispensation of the Teaching, through M.me Blavatsky.

14. Is Europe that Taurine *Eye of Revelation*, source of "Light through knowledge", which will serve by “holding its mind steady in the light”, in the clear vision of the One Humanity?

Among the 5 outlets for the energy of Shamballa and Hierarchy, Europe contains Geneva, the *heart centre*, and London, the plausible *throat centre*: we are told that these two centres, once fused and in harmony, cause the awakening of the *Ajna center* guided by the heart in the head, or by the Soul (by Buddhi-Manas): the awakening of New York under the command of Darjeeling or, at a higher level, of the Ajna centre Europe?

Also interesting is the symmetry between Europe, as the great Ajna Center which contains the heart center Geneva, and Asia, supposed as we shall see as a planetary heart center which contains the Ajna center Darjeeling (an Ajna between the 5 on the spine but a head center for its 1st Ray).

15. Another suggestion, the Ajna Center with its 96 petals is the synthesis of the lower centers and, with the evolution, from being the "seat of the multiple points of view" it becomes the operative center of the Soul which looks into the three worlds serving the unitary Purpose.
16. Furthermore, the formula for the 5th Aryan race indicated by the Teaching, which marries well with the multifaceted nature of the European nations, is precisely "unity in diversity", the European motto! When the multiple points of view converge in a harmonic system of perspectives at the service of the one Purpose, *universal Brotherhood*, "the Eye is open, and all is Light."

"Europe is therefore united
and united must remain,
One in diversity
May it spread peace in the world.

May it always reign in Europe
faith, justice
and the freedom of peoples
in a larger homeland.

Citizens, may Europe flourish,
a great work calls you!
Let the stars connect us,
golden emblem of the firmament."

17. Another interesting fact is the etymological comparison of the terms *Europe* and *Asia*, which seem to stand for *West* and *East*: they would have been introduced by the Phoenicians, who, spreading from Syria into the Mediterranean basin, would have generically indicated as West all the countries subsequently discovered up to the Strait of Gibraltar, as opposed to Asia, a name that was also derived from a Semitic word meaning "east".

However, for both names the Greek origin is not excluded: Europe and Asia already occur in Hesiod's *Theogony*, as sons of Oceanus and Tethys, but without any geographical reference being made; however, initially the name Europe was given to central Greece, later extended to all of Greece and from 500 BC. it was applied to all lands to the North of it.

(17 A clic). Here we propose two other etymological hypotheses for *Europe*: the first intends the name Europe as composed of two Greek roots, "eu" (large, great, benevolent) and "op" (root of seeing, vision) with the possible meaning of "**broad** face" or "**broad** gaze" which was a typical attribute of the Full Moon associated with the Great Mother (and the sacred Cow); while the second annexes to "eu" the term "row" (to flow, to stream), therefore "well watered", with an allusion to the ancient fertility rites.

18. After this symbolic trip and introduction, we therefore present, *in Europe and from Europe* to the whole world, the "**broad gaze**" or vision of a *harmonic System of Nations*, in order to carve the "fertile" paths towards the Aquarian Brotherhood, to the *systemic right relationships*, or planetary *group consciousness*.

19. The matrix of the "Harmonic System of Nations" is a reflection of the **1-3-7-49** hierarchical Model to give a *right Form* to the Idea of an international Order and Organism.

The Teaching tells us that Humanity as a planetary Center is a *collective Unity* constituted by and organized into 7 main races and human types, and many ethnic groups and peoples, distributed over 7 continents of which 5 are awakened or *active* as planetary Centres: these parts or organs of the 4th human kingdom are driven by the evolutionary Law, despite the prevailing separateness, to relate to one another through increasingly *comprehensive systems towards organic globality*,

20. And today, at the dawn of the Aquarian Era, we can affirm that from isolated and local units we have arrived to a *potentially single interactive community*. As an example, in its either vicious or virtuous use, the *technological revolution* of Internet clearly proves this *unified and global field*, right now mainly on an instinctive level of emotions and thoughts, but in due course also on an ever higher and more conscious level.

At present mankind still needs the Law of Pain to recognize our *unified field* and Oneness, namely *conflicts* in order to make the 4th Principle of Harmony as our triumphant Destiny; we move – seemingly slowly and yet at an accelerated pace – towards the ideal of *right human relationships*, which will in due time precipitate the Idea of **Brotherhood**.

21. “The forms through which these new and impending ideas must take shape and manifest have yet to be created, and that takes time, for they are built by the power of thought and due process of educating the public consciousness until that consciousness becomes confirmed conviction and demonstrates as an immovable public opinion.” (*The Rays and Initiations*, 121)

22. “...fear, foreboding and concern are but temporary and will give place to that ordered, rhythmic imposition of the needed idealism which will be applied eventually by love, motivated by wisdom in cooperation with intelligence. All will be actuated by a dynamic (not a passive) will-to-good.” (DN 7)

23. In the *Destiny of the Nations* we also read: “The major ideas in the world today fall into five categories”, and the last one is:

“5. The idea of a spiritual Hierarchy which will govern the people throughout the world and will embody in itself the best elements of the monarchial, the democratic, the totalitarian and the communistic regimes. *Most of these groups of ideologies have latent in them much beauty, strength and wisdom, and also a profound and valuable contribution to make to the whole.* Each will eventually see its contribution embodied under the control of the Hierarchy of the Lords of Compassion and the Masters of the Wisdom. The restoration of the ancient Atlantean control by the spiritual forces is still in the future but the Aquarian Age will see **the restitution of this inner and spiritual guidance on a higher turn of the spiral.**” (DN, 9-10)

So, having fixed the vision for the Future, let us now consider the fundamental role of the Nations to build *consciously* the hierarchical One Humanity.

24. Nations are presented by the esoteric Teaching as a “temporary manifestation of human races and sub-races”, those septenary centers of the 4th human Hierarchy; they are actual living, magnetic and conscious *collective Units*, equipped with a more or less manifested Soul or higher nature, a more or less integrated Personality and a body of territorial expression:

25. Here are the Nations Signs, Rays and Mottos indicated by DK – I outlined the 3 Signs Aquarius, Taurus and Pisces, rulers of the 3 planetary Heart, Ajna and Throat Centers, the Hierarchy, the NGWS and Humanity: “All of the great nations are controlled by two rays, just as is the human being. With the smaller nations we need not concern ourselves. All the nations are controlled by a

personality ray, which is the dominant potent and main controlling factor at this time, and by a soul ray which is sensed only by the disciples and the aspirants of any nation.

This soul ray must be evoked into an increased functioning activity by the New Group of World Servers, for this is one of their main objectives and tasks. ... those rays which govern a particular nation and which are at this time actively working are very potent, either materially or egoically; some of the problems may be due to the fact that certain rays, governing certain nations, are not at this time active.” (IHS 49-50)

There is a “vibratory interplay, under the great Law of Attraction and Repulsion which has much to do with the intercourse and relationships between nations”. (DN, 72)

26. And “... This coming age will be as predominantly the age of group interplay, group idealism and group consciousness as the Piscean Age has been one of personality unfoldment and emphasis, personality focus and personality consciousness.” (RI 108)

So, the *isolated Units* of the One Humanity, the **Nations**, must today rise to the *international group interplay, idealism and consciousness*, to their planetary or spiritual function, to ensure that the global Organism is *safe and sound*, at the Service of Evolution.

27. “Past and present cultures and civilisations are of great value; the peculiar genius of each nation must be evoked for the enriching of the entire human family; the new civilisation must have its roots in and emerge out of the past; new ideals must come forth and be recognized ... every nation, great and small (with the minorities given equal and proportionate rights) should pursue its own individual culture and work out its own salvation as seems best to it, but that each and all should develop the realisation that they are parts of one corporate whole and that they must contribute to that whole all they have and are. This concept is already present in the hearts of countless thousands and carries with it great responsibility.

28. These realizations, when intelligently developed and wisely handled, will lead to right human relations, economic stability (based on the spirit of sharing) and to a fresh orientation of man to man, of nation to nation, and of all to that supreme power to which we give the name "God." (EH, 376-7)

29. “Humanity itself must be the goal of interest and effort, and not any particular nation or empire. All this has to be wrought out in a practical, realistic manner, divorced from visionary, mystical and impractical dreams, and all that is done must be founded on one basic recognition—**human brotherhood, expressing itself in right human relations.**” (RI 122)

Nations, and not so much the current transitory peoples that represent them, are therefore intended as living organs in the process of progressive ‘coordinated cooperation’ for the health and development of the humanity-organism, which is in its turn a center/organ of the Planet-organism, and so on, in the all-encompassing *universal Brotherhood*.

30. The harmonic System of Nations, or the *Esoteric Order of the Nations -- United* in the name of the Common Good -- is certainly one of the most urgent Ideals to be nourished and vitalized, here&now, consciously all together, through the projection of the most beautiful vision of the One Humanity; and we do it with the help and because of our subjective or soul *medit-action*, through our *creative imagination*, the medium of the higher mind to unite the World of Ideas and Ideal formulas with that of the Forms of the new Culture and Civilization.

31. Every Nation, which has sufficiently integrated its Personality, that is, stabilized its Individuality with respect to the planetary Community, will progressively know its potential and

possibilities; and the astrological key and their constituent Rays, as well as the examination of the virtues and defects of their peoples, their talents and fragility, can illuminate the unitary path to follow, converging towards the One, in function of the planetary common Good.

32. In particular, here are presented 3 hypotheses of a ‘right sorting’, or harmonic arrangement of the System of Nations according to the 49 matrix of Ray energy combinations or Functions -- the Model of hierarchical organization of Life and of its Agents or Builders. According to this view, this Pythagorean Lambdoma, or 7x7 matrix ruled by the Seven Rays of Life, is a scientific and magic way to “square the circle” of any Idea,

33. here of the evolutionary Plan of the *hierarchical Humanity*: a matrix of 49 planetary Goals or energy Vortices as a first *systemic formulation* of Its buddhic energies or impulses onto the causal and fiery World of manasic Thought, therein fixing its living 7 main centers (or Goals taken from the Teachings) along the central diagonal and 42 minor ones.

The 49 Centers or Fires of Brahma of any celestial Idea have to be activated by group soul attestation and meditation – and in this systemic perspective, through their 49 relevant Functions and Ideal formulas that the hearts and minds –

34. or **Nations!** -- have to translate in a Harmonic Action, that is, into a spiritual coordinated cooperation for the Common Good.

The Plan or the planetary Order, or any Idea, is a living Entity, a *substantial energy* and an *energetic substance*, which requires a harmonic human system of relationships, first to be defined and then realized in the three worlds, in order to bring about the main Idea of *Brotherhood*.

In the following 3 hypotheses the central diagonal, identified with the 7 main Centers of the 4th human Hierarchy on Earth, is filled according to 3 different perspectives, while the 42 subsidiary boxes are by the Nations, placed according to their indicated Soul and Personality Rays.

The 3 perspectives see the sevenfold central axis identified according to the 3 Aspects of Spirit - Consciousness - Substance, as esoteric Science teaches us:

35. 1ST HYPOTHESIS

- 1) CONTINENTS are indicated as the *substantial Form* of the Seven planetary Centers: “...*five races*, under the influence of the five signs, produce the *externalizations* which are called the five continents—Europe, Africa, Asia, Australia, America. These five continents are to the planetary Life what five major *endocrine glands* are to the human being. They are related to five centres.” (AE, 426) – as we know, 5 already manifested, 7 potential.

36. 2ND HYPOTHESIS

- 2) the *consciousness* aspect of the Seven Centers of the 4th human Hierarchy is represented by the 7 Ray Groups of Initiates, operating through our higher nature or the 7 *egoic groups* on manasic level. They were, are and will educate and initiate their affiliated souls in the indicated 7+7 OCCULT SCHOOLS (as written in *Letters of Occult Meditation*), intended as cradles of the initiatory Seeds of the future Culture and Humanity,
37. "...only those nations which originally had a training school for the mysteries (with three exceptions) will be again, during the earlier stages, permitted national schools. The exceptions are:—
1. Great Britain.
 2. Canada and the United States.
 3. Australia.

And even these exceptions might be considered only one, the case of Australia, for the other two in Atlantean days had their occult foundations when they formed part of the earlier continent....

So, here along the central axis, we have the Rays attributions of the 14 initiatory Schools:

[*Preparatory Grades* ----- *Advanced School*

38. 3RD HYPOTHESIS

- 3) the *spirit* or *Life* aspect would be concerned with the “5 planetary inlets” (+ 2 still hidden) indicated in the Teachings as the five main CENTERS of the present “5th Root-race” of humanity, corresponding to five key cities, through which Hierarchy and Shamballa distribute Their energy.

“...there are today in the body of Him in Whom we live and move and have our being, five focal points of spiritual energy, expressing themselves through five awakened centres in that body. These five are:

... There are two centres in the planetary Life which are as yet relatively quiescent as far as any world effect is concerned. To them I assign no other focal point beyond hinting that within the continent of **Africa** one will someday be found, and later still (many millions of years ahead) another will be discovered in the region of **Australia**. It is, however, with the five centres in this fifth root-race that we are concerned." (AE, 521)

40. "Through these five places and the areas in their neighbourhood **the energy of the five rays [1-2-3-6-7]** pours forth, conditioning the world of men, leading to results of profound significance and determining the trend of events ...] through the five major centers in the planet today, spiritual energy is streaming forth, and according to the vehicle of expression which receives its impact so will be the reaction and activity...

41. The five cities which are the exoteric expression of the esoteric center of force and through which the Hierarchy and Shamballa are seeking to work are the correspondence in the planetary body to the four centers up the spine and the ajna center in the body of humanity and of individual man. ...they are "living vital focal points of dynamic force" to a greater or less extent. Some predominantly express soul energy and some personality force; some are influenced by Shamballa [Darjeeling and Geneva?] and some by the Hierarchy." (DN, 92&102)

42. Attributions are mere working hypothesis, and it would be beautiful to constitute one day a study group to examine and inquire into them. These charts, even if incomplete, allow us to compare the 'talents' and tasks of each Nation, and to order their Functions at the service of global development, according to these 3 different levels of planetary Septenaries -- of **Centers, Schools or Continents**.

43. The mission of true Humanity is to learn *intelligent love* or the *coordinated collaboration for a common Purpose*, another way of defining the hierarchical Order, "the systemic relations".
 "the immediate objective of the human kingdom is consciously to establish systemic relations, [1216] and be actively, and consciously, part of group work." ("A Treatise on Cosmic Fire")

It's up to each of us, therefore, to contemplate this or some other form of the hierarchical Model of the world, where no Nation commands or suffers, but where each people assumes, once able to do so, responsibility for their real Nature and Function, in perfect *systemic or integrated* harmony and accordance with that of others.

As the vision deepens, it will be necessary to probe its profound implications, symmetries and correspondences in national peoples or in international relations.

44. For now, let's ventilate our hearts and minds with this common Dream - the real possibility of a *United Nations Order (UNO)* at the service of the Good and of the global New Culture and Civilization: the Idea of a hierarchical Humanity, of *Brotherhood*.

“... life is **loving synthesis in action**, and of that there is little today in demonstration. We have life in activity but love, based on realised unity and leading to expressed synthesis, is still absent. The **vision** of it is, however, upon the horizon of many, for in these days many are attaining sight and light is pouring in. Revelation will come when the world disciples and initiates have perfected the art of revelation. (Alice Bailey - *Rays and Initiations*, p. 300)

45. So: “let our Light shine!” to build the One Humanity.

*Heaven doth with us as we with torches do,
not light them for themselves;
for if our virtues did not go forth of us,
'twere all alike as if we had them not.*
(William Shakespeare, *Measure for measure* - Act I, Scene 1)
